

## Imation REACH Statement

November 25,2008

### **Imation product compliance with European REACH requirements**

To whom it may concern,

Please note that all of Imation products, as well as those brought into the market by Imation under its additional brand names TDK *Life on Record*, Memorex or ExtremeMac are in compliance to the REACH requirements in the following context :

- Awareness of Imation EHS (Environmental Health Services department) solicited product information from the Imation Accessories Sourcing Manager for Europe and Americas, Imation Global Sourcing, Imation Memorex Taiwan and European Technical HDE Data Storage Manager in an effort to identify products and articles imported to Europe.
- Alkaline batteries and PC Quick Wipes were the only products identified being imported by Imation Europe.
- The batteries are exempt as articles and do not contain any substances of very high concern as defined by REACH regulations.
- Quick Wipes contain chemical substances but the total imported weight of the product is well below one ton per year, which is the limitation set by REACH.

As a result of above there is no requirement at this time to Imation to register or pre-register for REACH. Should Imation bring products to market that fall under the REACH requirements or should REACH requirements change to the degree that current products would fall under those rules, Imation will immediately initiate all activities required to register.

A handwritten signature in black ink that reads "George Turiso". The signature is written in a cursive style with a large, stylized 'G'.
