Lenovo

Lenovo ThinkAgile MX for Azure Stack HCI

With Lenovo ThinkAgile MX, your customers can integrate hyperconverged infrastructure with Azure and hybrid services to run virtual workloads on premises.

Starter Kit Promotion!

For a limited time only, Lenovo Resellers can earn instant cashback when selling:

ThinkAgile MX Nodes for Azure Stack HCI

+

Windows Server 2019 Datacenter (Lenovo ROK or Feature Code)

Earn 600 USD Instant Cashback* per Eligible ThinkAgile MX Node up to 16 Nodes per Customer!

Microsoft launched the new Azure Stack HCI OS (20H2) – a separate operating system to run hyperconverged solutions that is natively integrated with Microsoft Azure. This mean you can now deploy hyperconverged solutions from Microsoft in two different ways: either by using the features included in Windows Server 2019 Datacenter Edition or by installing the new subscription based Azure Stack HCI OS. Both deployment scenarios require Windows Server 2019 Datacenter Edition licenses if users want to deploy an unlimited number of guest VMs.

How do I apply?

1 Register your deal with Lenovo in order to take part in this Promotion by emailing **thinkagilemx@lenovo.com** or clicking **here**.

2 When creating your bid, inform your Lenovo Distributor who will apply a special discount code to your order.
