**Crear un futuro más fuerte y simple para la ciberseguridad
al permitir a las organizaciones aumentar su madurez de
seguridad y disminuir su carga operativa**

Los equipos de seguridad están sobrecargados con proveedores y productos

Esto incrementa la complejidad de gestión, y deja “huecos” que pueden ser explotados en ataques multi-vector.

Organizaciones usando
50+ Productos

Organizaciones usando
100+ Productos

“The problem is much worse than this. All you need are 10 to 15 products from different providers and you have a nightmare on your hands.”

Fortune 500 CISO (Entertainment)

“We actually have over 200 security products. Don’t share this with anyone.”

Fortune 500 CISO (Manufacturing)

Network & Infrastructure Security

Advanced Threat Protection, NAC, SDN, DDoS Protection, DNS Security, Network Firewall, SASE, Deception

ICS + OT, Network Analysis & Forensics

Web Security

Web Security companies including Akamai, aurlonpro, AUTHENTIC8, etc.

Endpoint Security

Endpoint Prevention, Endpoint Detection & Response

Application Security

WAF & Application Security, Application Security Testing

MSSP

Traditional MSSP, Advanced MSS & MDR

Data Security

Encryption, DLP, Data Privacy, Data Centric Security

Mobile Security

Mobile Security companies including appdome, BETTER, etc.

Risk & Compliance

Risk Assessment & Visibility, Risk Quantification, Pen Testing & Breach Simulation, GRG, Security Awareness & Training

Security Ops & Incident Response

SIEM, Security Incident Response

Threat Intelligence

Threat Intelligence companies including 4iQ, ANOMALI, etc.

IoT

IoT Devices, Automotive, Connected Home

Messaging Security

Messaging Security companies including AGARI, AREA 1, etc.

Identity & Access Management

Authentication, IDaaS, Privileged Management, Identity Governance, Consumer Identity

Security Analytics

Security Analytics companies including AWAKE, BROADCOM, etc.

Digital Risk Management

Digital Risk Management companies including OGD, C.H.I.P., etc.

Security Consulting & Services

Security Consulting & Services companies including accenture, CAPTURE, etc.

Blockchain

Blockchain companies including ANCHOR, BLOCKJAMMER, etc.

Fraud & Transaction Security

Fraud & Transaction Security companies including BIOCATCH, BLOCK FRAUD, etc.

Cloud Security

Container, Infrastructure, CASB

Network & Infrastructure Security

Advanced Threat Protection

Check Point, Cisco, Palo Alto, Sophos, Fortinet, McAfee, Mimecast, Palo Alto, RESEC, SonicWall, Sophos, Fortinet, Imperva, Neustar, NeusGuard, Infoblox, Neustar, Secure61, ThreatSTOP

NAC: Duo, Arxionius, ForeScout, Fortinet, Gemliams, Portnox, Palo Alto, Trustwave

SDN: Cisco, Cybera, Cyxtera, Tempred, Transient, Versa, Zentara, Zero, Zscaler

DDoS Protection: Fortinet, Imperva, Neustar, NeusGuard, Infoblox, Neustar, Secure61, ThreatSTOP

DNS Security: Bluecat, Infoblox, Neustar, Secure61, ThreatSTOP

Network Firewall: Cisco, Palo Alto, SonicWall, Sophos, Fortinet, Imperva, Neustar, NeusGuard, Infoblox, Neustar, Secure61, ThreatSTOP

SASE: Cisco, Palo Alto, SonicWall, Sophos, Fortinet, Imperva, Neustar, NeusGuard, Infoblox, Neustar, Secure61, ThreatSTOP

Deception: Cisco, Palo Alto, SonicWall, Sophos, Fortinet, Imperva, Neustar, NeusGuard, Infoblox, Neustar, Secure61, ThreatSTOP

MITRE
ATT&CK®
+ FORTRA™

Risk Mitigation
Prevent the technique from being used

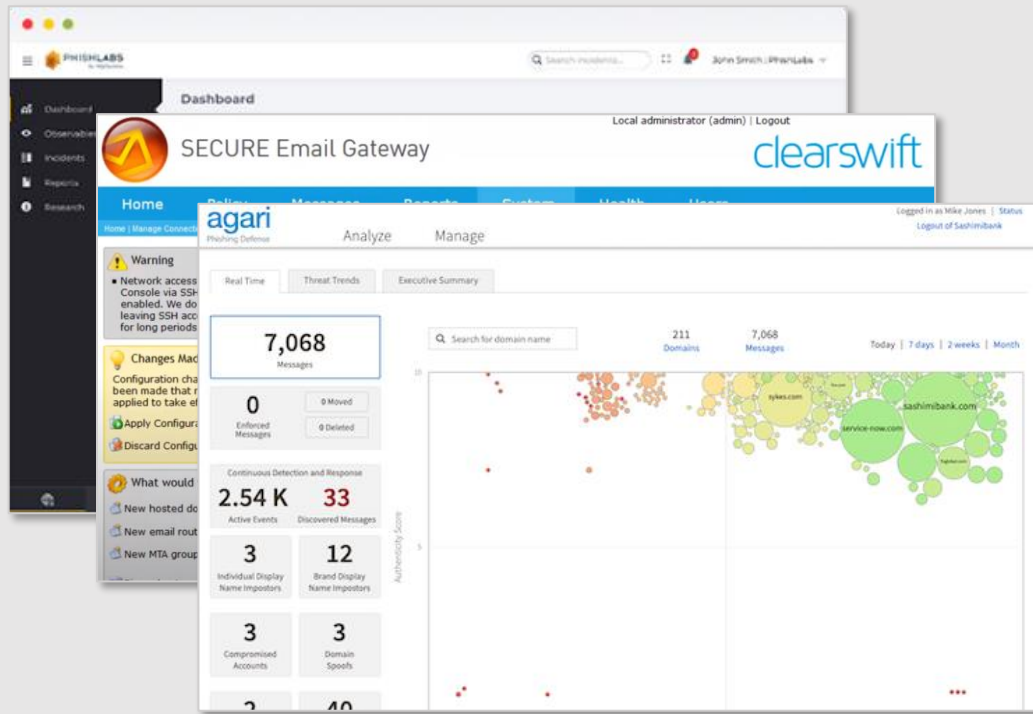

Risk Detection
Real-time detection of misconfigurations, policy violations and attempts/successful usage of techniques.

Risk Identification
Recurring identification of vulnerabilities, misconfigurations and policy violations.

Risk Testing
Attempt to use the technique or get information to identify and quantify existing risks

Estamos construyendo una Plataforma unificada para simplificar la complejidad de gestionar múltiples soluciones

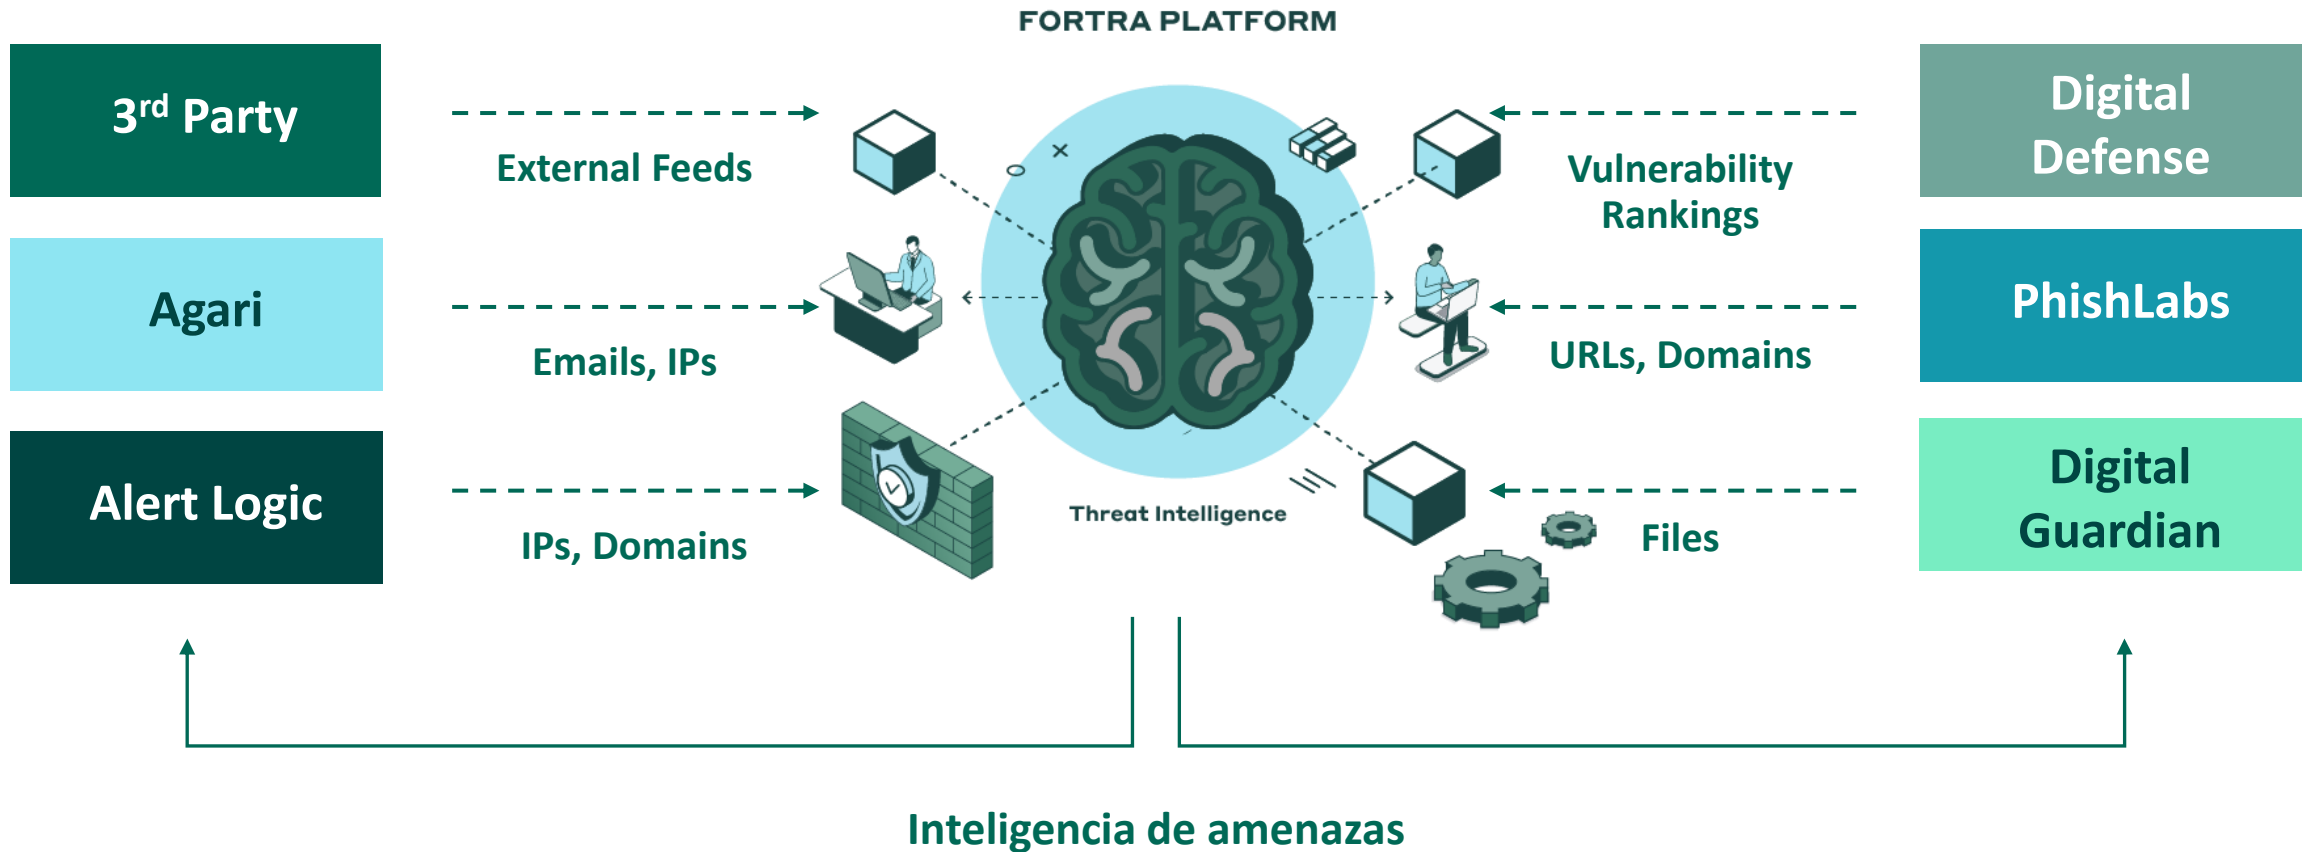

Interfaces distintas

Una interfaz con capacidades multi-vector

Y creando el Fortra **Threat Brain** para **correlar** cada riesgo e indicador de compromiso por múltiples vectores para nuestra base de clientes

PROTECCIÓN DE DATOS

- ✓ Data Loss Prevention: Endpoint, Network and Email
- ✓ Data Classification
- ✓ Data Discovery
- ✓ Secure File Sharing

Digital Guardian | Boldon James | Vera

SEGURIDAD DE EMAIL & ANTI-PHISHING

- ✓ Secure Email Gateway
- ✓ Advanced Anti Phishing (BEC)
- ✓ DMARC
- ✓ Security Awareness Training

Agari | Clearswift | Terranova

PROTECCIÓN DE RIESGOS DIGITALES

- ✓ Brand Protection
- ✓ Account Takeover Protection
- ✓ Social Media Protection
- ✓ Takedown / mitigate threats

PhishLabs

SECURE FILE TRANSFER

- ✓ Managed File Transfer
- ✓ Processes orchestration and automation
- ✓ Secure Email & Collaboration
- ✓ File Acceleration

GoAnywhere | GlobalScape | Filecatalyst | Clearswift

GESTIÓN DE VULNERABILIDADES

- ✓ Vulnerability Management
- ✓ Web Application Scanning
- ✓ Application Security Testing
- ✓ File Integrity Monitoring (FIM)
- ✓ Security Configuration Management (SCM)

Digital Defense | Beyond Security | Tripwire

SEGURIDAD OFENSIVA

- ✓ Automated Pen Testing
- ✓ Adversary Simulations
- ✓ Red Team Operations

Core Security | Cobalt Strike | Outflank

MANAGED DETECTION AND RESPONSE

- ✓ Managed Detection & Response
- ✓ Managed Web Application Firewall
- ✓ 24/7 SOC and Threat Intel Expertise

Alert Logic

IBM i SECURITY

- ✓ Compliance
- ✓ Antivirus
- ✓ Encryption
- ✓ System hardening
- ✓ High-Availability

Powertech

MANAGED SERVICES

FORTRA

Protección de datos

Retos en las organizaciones

Presión para asegurar los datos críticos

Presión para proteger los datos más críticos:

- Propiedad intelectual
- Datos del cliente
- Datos de los empleados
- Información financiera
- PII, PCI, PHI
- Cumplimiento: GDPR/NIST/ITAR/CCPA etc.

Despliegues largos y dolorosos de DLP

Muchos proyectos de protección de datos/DLP se vuelven largos e interminables.

Se requieren soluciones pragmáticas, de despliegue, rápido, que guíen al usuario, descubran y clasifiquen con inteligencia artificial.

Colaboración Segura

Las organizaciones deben proteger sus datos críticos y mantenerlos seguros.

Sin embargo, para que las empresas funcionen, **los datos deben compartirse** más allá de la protección corporativa.

Fortra's Data Protection

Soluciones entrelazadas que protegen sus datos a la vez que mantienen la productividad de sus usuarios.

Digital Guardian DLP es nuestro caballo de batalla de protección de datos, con una rápida implementación y resultados, y una mayor eficacia implementada.

Data Loss Prevention

Data Classification

La clasificación de datos de Fortra aumenta la eficacia de su DLP, al tiempo que reduce la fricción y aumenta la conciencia de seguridad de los empleados.

Permite compartir datos de forma segura dentro y fuera de su entorno, desde el cifrado proactivo hasta la resolución de exposiciones accidentales de datos.

Secure Collaboration

¿ Como soporta Fortra este escenario ?

Lucas (backoffice)

Sam (negocio)

John (socio)

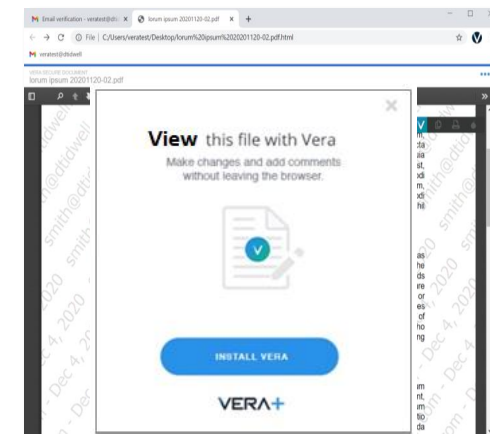

Clasificación de datos
 “Confidencial – Solo interno”
 País origen: España
 Datos: PII, GDPR

Clasificación manual, guiada y/o con IA

Gobierno de datos
 Definir política DLP
 “Remediación – Bloquear o Justificar”

Or...

Compartir de forma segura
 “Control acceso + encriptación +
 marca de agua + solo lectura”

Caso real: Clasificación de datos en contratista de defensa – aero espacial

- ❑ Problema a resolver: “**Export Control**” - Con el objetivo de prevenir el desarrollo de “armas biológicas, nucleares y en general otros tipos”, la Unión Europea restringe y controla el intercambio en algunos bienes”
- ❑ Cada “**producto**” debe ser clasificado con un ECCN. Cada producto está compuesto por posiblemente cientos de otros “productos”.
- ❑ Ficheros a clasificar y proteger: diseños, planos, fotografías, etc relacionados con tecnología “controlada”

¿Por qué Titus de Fortra para clasificar ?

- ✓ “Asistente” para el usuario final para guiarle en la clasificación correcta.
- ✓ Añadir multitud (cientos!) de metadatos persistentes de contexto: ¿con quién se puede intercambiar un archivo? ¿En qué países? ¿Fechas expiración? ¿Sensibilidad? ¿Qué proyecto? ... para reforzar la seguridad de los datos.
- ✓ Usado por cientos de organizaciones de defensa: ministerios de defensa, policía, servicios secretos, contratistas, etc.
- ✓ Posibilidad de despliegue 100% on-premise
- ✓ Soporte para gran complejidad de niveles de clasificación, con, por ejemplo, dependencias anidadas ,selecciones múltiples.

Export Control Classification Numbers (ECCNs)

Breakdown of categories

- 0 = Nuclear materials, facilities, and equipment
- 1 = Special materials and related equipment
- 2 = Materials processing
- 3 = Elect
- 4 = Com
- 5 = Tele
- 6 = Sens
- 7 = Navi
- 8 = Mari
- 9 = Aero

Breakdown of product groups

- A = Systems, equipment, and components
- B = Test, inspection, and production equipment
- C = M
- D = S
- E = T

Breakdown of reasons for control (cat

- 001 - 099 = Wassenaar Arrangement
- 101 - 199 = Missile Technology Cont
- 201 - 299 = Nuclear Suppliers Group
- 301 - 399 = Australian Group
- 401 - 499 = Chemical Weapons Con
- 501 - 899 = (reserved)
- 901 - 999 = National controls

Caso real: DLP en una de las Consultoras top mundiales

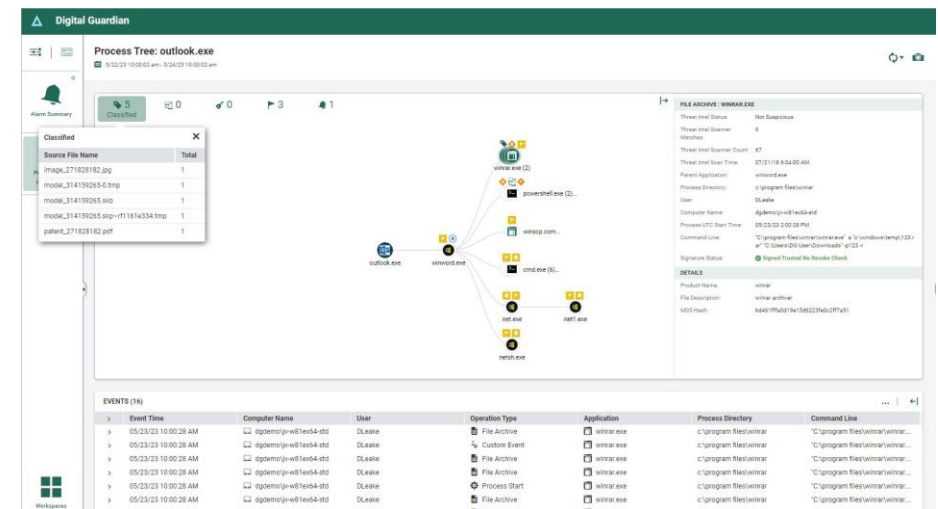

- ❑ Situación inicial: **+600.000 end points**, usando un DLP conocido de terceros. Difícil de gestionar. Muchos falsos positivos. Mala integración con clasificación. Deciden reemplazar.

¿ Por qué eligieron Digital Guardian de Fortra?

- ✓ PoCs con virtualmente todos los DLP Enterprise
- ✓ Posibilidad de mapear su complejidad en políticas de protección de datos
 - ✓ Política global + políticas geográficas + políticas por vertical para más de medio millón de empleados
- ✓ Clasificación basada por **contexto**: usuarios, grupo de usuarios, ubicación de los ficheros, etc + Clasificación basada en **contenido**
- ✓ Integración bidireccional con MIP (Purview)
- ✓ Ejemplo: usuario hace captura de pantalla, y comprime en zip. DG sigue los datos y aplica etiqueta Purview en cada paso, asumiendo que es una captura de una aplicación que contiene datos sensibles.
- ✓ Visibilidad total en portal único (reporting big data)

4 de las 5 consultoras top tienen proyectos de DLP con Digital Guardian

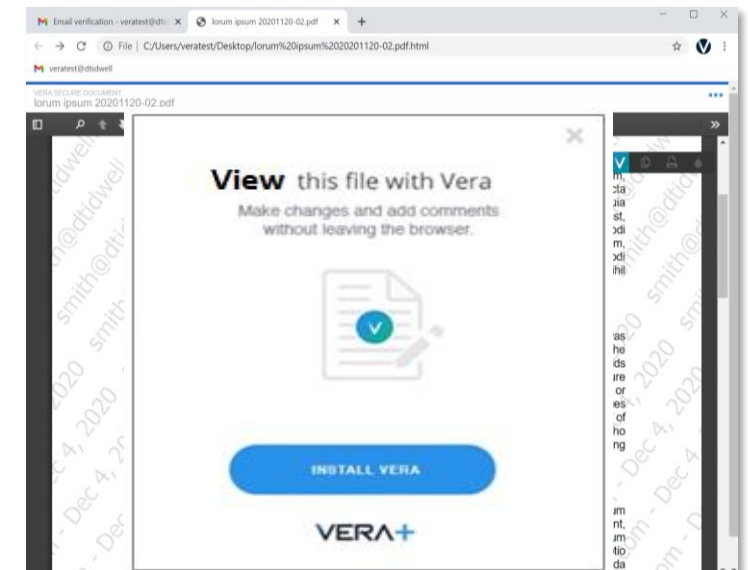

Caso real: Compartición Segura de datos en empresa de ropa deportiva

- ❑ Problema a resolver: **Proteger diseños** (propiedad intelectual)
- ❑ Los diseños se comparten con socios que los fabrican en múltiples países, principalmente en Asia.
- ❑ **“Clones” aparecen a la venta antes del lanzamiento del producto original -> Los diseños se filtran/venden a terceros.**

¿Por qué Vera de Fortra para proteger los datos ?

- ✓ Seguridad que viaja con los ficheros, encriptación
- ✓ Posibilidad de revocar permisos cuando ya no son necesarios
- ✓ Imposible compartir originales (ie, Autocad) con terceros
- ✓ Auditoría de quien accede a los ficheros, cuando, desde dónde.
- ✓ Granularidad de políticas:
 - ✓ solo lectura, modificación, copiar, pegar, imprimir, marca de agua, etc.

PROTECCIÓN DE DATOS

- ✓ Data Loss Prevention: Endpoint, Network and Email
- ✓ Data Classification
- ✓ Data Discovery
- ✓ Secure File Sharing

Digital Guardian | Boldon James | Vera

SEGURIDAD DE EMAIL & ANTI-PHISHING

- ✓ Secure Email Gateway
- ✓ Advanced Business Email Compromise (BEC)
- ✓ DMARC
- ✓ Security Awareness Training

Agari | Clearswift | Terranova
