

August 2011

## REACH Statement

The European Regulation concerning Evaluation, Authorisation and restriction of Chemicals - REACH (EC 1907/2006) entered into force on 1. June 2007 and will be implemented in phases until 31. May 2018.

The RFS Group is as a producer of telecommunication equipment downstream user of chemicals and preparations under the definitions of REACH. RFS does not manufacture or import chemical substances to the EU in quantities above 1 ton per annum and is therefore not obliged to pre-register or register under the REACH regulation. – Art. 7(1).

As per today's status RFS products (and their packaging) do not contain more than indicated % of weight by weight (w/w) of substances which are listed<sup>(1)</sup> as substance of very high concern (SVHC) published on 20. June 2011. In case of any change, we will inform you in line with the requirements of REACH – Art. 7(2) & 33.

To secure product safety and delivery on time we have checked the status of pre-registration within our supply chain and will further track on the renewal of safety data sheets for all chemicals purchased by RFS. The implementation of REACH will be an element of our supplier qualification.
