SETUP WITH JUST A FEW CLICKS**

Use existing LTE or WiFi infrastructures.

- Flexible talkgroups
- GPS positioning
- Video, photo and file sharing
- Geofencing

WAVE™

WAVE™ – quick and inexpensive communication

To achieve successful results, your teams must be able to communicate quickly at all times. You are also faced with the challenge of integrating the widely varied devices used by your employees, such as smartphones, PCs and radios, into that communication.

To work productively, you need a way to communicate seamlessly across multiple devices.

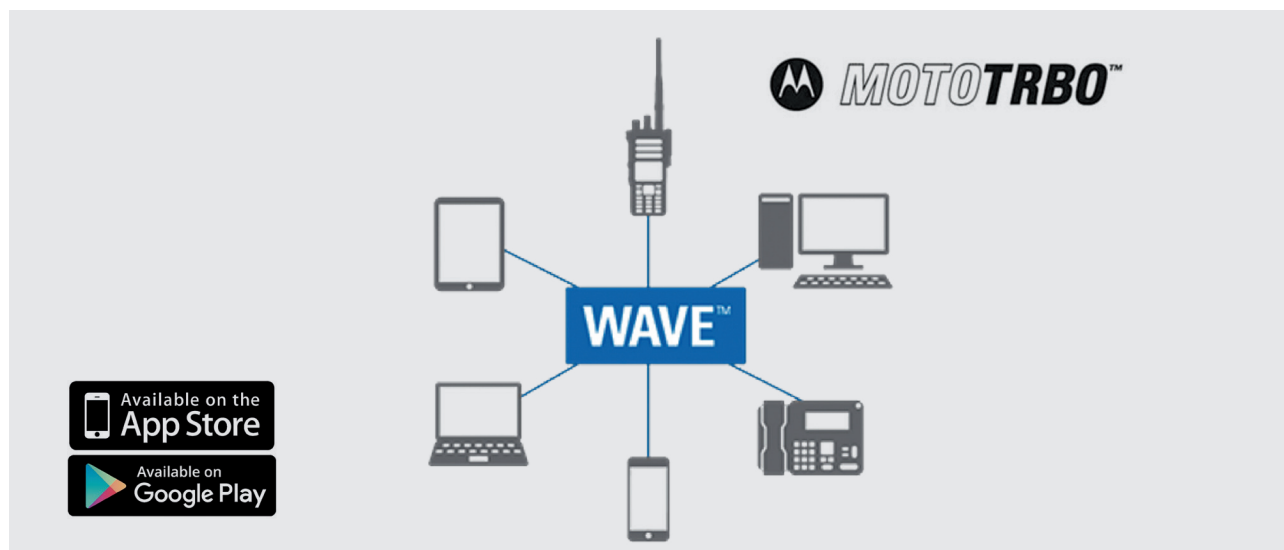

SEAMCOM has the solution

With WAVE's Push-to-Talk service, you can quickly and securely connect your team to the cloud, regardless of their device or network operator.

There is no need to install a separate server. For the smartphones used, you simply download the app and start communicating without delay.

You can easily add or remove users as your business needs change. Optimize your communication with push-to-talk and mapping in a single app.

A simple WAVE gateway connects your MOTOTRBO and smartphone users to the desired work groups.

WAVE™ RADIO TLK 100

WAVE WIRELESS SERVICE COMBINED WITH THE WAVE RADIO TLK 100

GET THE BENEFITS OF WAVE AND A
RUGGED TWO-WAY RADIO ON A

- Message threads
- Text, video, photo, and file sharing
- Location & Mapping
- Location history and replay
- In-map communication

Examples

1.

A team of 10 employees needs to carry out adhoc repair work on a large object:

The responsible manager is far away but wants to contribute their expertise during the repair.

2.

A local municipality can independently setup radio/talk groups, if the situation requires it:

A sudden flood means that emergency services, public utilities and municipal employees must work and communicate together. With just a touch of a button on the device, I can reach a complete task force that has just been put together in the cloud by the head of operations.

Get Europe-wide PTT in no time

Place your order, receive your device and start communicating

EUROPE-WIDE PTT IN A FEW SIMPLE STEPS

ORDER, UNPACK, USE

** The configuration is carried out by the Reseller or the Reseller can grant permission to the end user to perform the configuration.
