

# February 2017 Announcement Summary

## ☆ HPE announces several 3PAR innovations for customers' all flash data center

13 February, 2017 was a big announcement day for HPE 3PAR StoreServ. The HPE Storage [press release](#) describes all of the details, however in summary, we launched new features and enhancements that deliver on customer requirements for the All-Flash Data Center:

- **Investment:** Reduce capacity needs by 75% with Adaptive Data Reduction (including Compression) and simplify licensing with the new All-Inclusive model
- **Apps:** Free 20% performance boost and expanded use cases for Flash with iSCSI enhancements, Express Write, and File Persona
- **Risk:** Deliver a highly resilient all-flash data center from core to cloud to edge with Persistent Checksum, 3DC Peer Persistence, Peer Copy and 3PAR flash-integrated data protection with RMC 4.0
- **Ops:** Automate from data center to data service with SSMC 3.1 with Smart SAN and dashboard enhancements

For more details, please visit the [Partner Ready Portal](#). As part of this announcement, many new and updated assets are now available for you and your customers.
