

MediaSprint Display- Mobile

... and your presentation
is perfect!

MediaSprint Display-Mobile

“a mobile support system for displays with a weight of up to 100 kg“.

Electronic height adjustment, with 950 mm adjustment range.

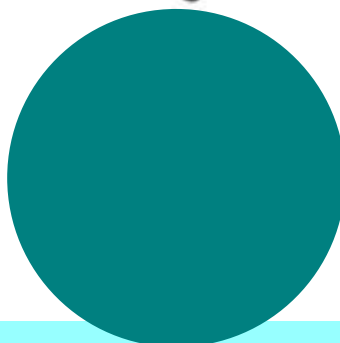

The system can support up to 110 KG (all devices included).

Robust castors, Ø 125 mm, assure easy and safe operation, even on difficult ground. Two of the castors are equipped with a directional locking device. This tool makes sure that the handling is safe even on slanting ground.

MediaSprint Display-Mobile: means reliability for your display and perfect handling.

950 mm adjustable at the push of a button or with remote control

Perfect management of cables

Comfortable features make sure that your audience will receive your message:

- Electronic adjustment of height and inclination at the push of a button
- Big castors with directional locking device assure safe transporting
- High stability guarantees extreme durability
- Clever management of cables prevents cable mess
- Additional devices can be plugged in due to integrated multi-plug box
- Individual wishes considered on request

MediaSprint Display-Mobile will be delivered fully assembled, only the display has to be attached. Quick, clean and safe.

Suitable for plasma displays of approx. 50" – 65". Special wishes on request.

Over 950 mm motor driven adjustment of height

In "rest position" small and easy to handle
